15mm

torayvino

— easy to install on your faucet!

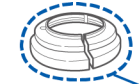

Please measure faucet diameter using the measure below.

15mm

Attachment nut

Adapter

Make sure to correctly identify the faucet type. Optional part (free) may be needed for some faucets.

CAUTION Faucets which DO NOT accept the unit

- | | | |
|---|--|-----------------------------|
| <p>❌ Vertical section of spout less than 15mm in length</p> <p>less than 15mm</p> | <p>❌ Screw threads more or less than 22mm in width</p> <p>more or less than 22mm</p> | <p>❌ Shower nozzles</p> |
| <p>❌ Spout diameter more than 25mm or less than 13mm</p> | <p>❌ Non-standard spout head</p> <p>Square Oval</p> | <p>❌ Spout with sensors</p> |

- Leaks resulting from breakage of spout or spout parts are not covered by our guarantee.
- When a plastic insulation cap is attached to the end of the spout, water may leak from the faucet or the water purifier may not fit the faucet or the insulation cap may be broken, depending on the faucet type and condition.
- If the faucet is not tight enough, excessive load on the faucet may cause water to leak from the attachment part, faucet or the plumbing system.

Faucet types or installation instruction are also available online.
